

## API ENDPOINT PLAN

| HTTP Method | Route              | Description                                                               |  |  |  |
|-------------|--------------------|---------------------------------------------------------------------------|--|--|--|
| <b>POST</b> | /api/auth/register | Registers a new user account as an Organiser or Participant.              |  |  |  |
| <b>POST</b> | /api/auth/login    | Authenticates user credentials and establishes server-side session state. |  |  |  |
| <b>POST</b> | /api/auth/logout   | Invalidates and terminates the active session.                            |  |  |  |
| <b>GET</b>  | /api/users/profile | Retrieves current authenticated profile attributes.                       |  |  |  |
| <b>PUT</b>  | /api/users/profile | Updates profile attributes and profile image URL.                         |  |  |  |
| <b>GET</b>  | /api/events        | Retrieves all available road running, walking, and cycling events.        |  |  |  |
| <b>GET</b>  | /api/events/{id}   | Retrieves detailed metadata and categories for an event.                  |  |  |  |

|               |                                  |                                                                    |  |  |  |
|---------------|----------------------------------|--------------------------------------------------------------------|--|--|--|
| <b>POST</b>   | /api/events                      | Creates a new event record.                                        |  |  |  |
| <b>PUT</b>    | /api/events/{id}                 | Replaces or updates existing event information.                    |  |  |  |
| <b>DELETE</b> | /api/events/{id}                 | Deletes an event and its dependent sub-resources.                  |  |  |  |
| <b>GET</b>    | /api/events/{eventId}/categories | Retrieves all sub-categories configured for an event.              |  |  |  |
| <b>POST</b>   | /api/events/{eventId}/categories | Appends a distance or age division to an event.                    |  |  |  |
| <b>POST</b>   | /api/enrolments                  | Enrols the logged-in participant into an event category.           |  |  |  |
| <b>GET</b>    | /api/enrolments/my-enrolments    | Lists all race registrations belonging to the current participant. |  |  |  |
| <b>GET</b>    | /api/events/{eventId}/enrolments | Lists all participant entries for an organiser's event.            |  |  |  |
| <b>POST</b>   | /api/results                     | Records official finish times and overall positions.               |  |  |  |
| <b>GET</b>    | /api/results/my-results          | Retrieves performance history across past events for the caller.   |  |  |  |

|             |                   |                                                                  |  |  |  |
|-------------|-------------------|------------------------------------------------------------------|--|--|--|
| <b>POST</b> | /api/media/upload | Uploads an image file to Azure Blob Storage and returns its URI. |  |  |  |
|-------------|-------------------|------------------------------------------------------------------|--|--|--|
